Botanical Garden of Vilnius University

Botanical Garden of Vilnius University is not only the largest garden in Lithuania (total area of 199 hectares) but also has the richest collection of plants: here you can admire about 10,000 taxa of plants. The richest and the most impressive collections are rhododendrons, lilacs, lianas, peonies, dahlias and bulb flowers. Botanical Garden of Vilnius University is also considered to belong to the list of world's heritage objects – a part of the old manor and an Old Park with ponds has survived through centuries and is adapted for visitors in Kairėnai. Various cultural events (concerts, art exhibitions) often take place in the Garden. There is also a possibility to go riding or to take a horse carriage. Illustrated guidebooks and broadly developed information system are ready for individual visitors. Moreover, guided tours could be arranged. The garden can also boast of recreational and picnic areas.

• Distance from the airport: 19 km
